DESCRIPTION OF THE BOOK DIGITAL APPLICATIONS FOR CULTURAL AND HERITAGE INSTITUTIONS

Electronic imaging and digital applications have brought numerous benefits for museums, galleries, archives and other organizations in the arts, culture and heritage sectors. Bringing together leading international practitioners from different disciplines, the EVA (Electronic Imaging and the Visual Arts) conferences help those working in the field to gain the most from developments in multimedia technology. This accessible volume collects recent papers from EVA conferences, covering case studies from the world's greatest institutions, as well as from some of the smallest and most innovative. Topics covered include virtual reconstruction of destroyed buildings, digital image archiving, 2D and 3D digitization projects, website evaluation, virtual archaeology, handheld interactive visitor support, exploiting digital cultural heritage and electronic aids for non-speaking people, as well as summaries of international research and technology development. The volume presents in convenient form the wealth of experience of a great variety of international specialists, allowing readers to further enhance the visitor experience of their collections.

DIGITAL APPLICATIONS FOR CULTURAL AND HERITAGE INSTITUTIONS

digital imaging and electronic functions have introduced a number of merits for museums, galleries, information and different organisations within the arts, tradition and history sectors. Electronic imaging and digital applications have brought numerous benefits for museums, galleries, archives and other organizations in the arts, culture and heritage sectors. Bringing together leading international practitioners from different disciplines, the EVA (Electronic Imaging and the Visual Arts) conferences help those working in the. Electronic imaging and digital applications have brought numerous benefits for museums, galleries, archives and other organizations in the arts, culture and heritage sectors. Overall, the book provides a valuable overview of the breadth and scope of topics that are relevant to digital applications in the cultural heritage domain. This is reflected in the seven major themes that the book tries to cover - each of which is a huge area in its own right. Digital Applications for Cultural and Heritage Institutions. Ashgate. Computing in the arts, humanities and heritage sectors is becoming more pervasive, and increasingly sophisticated technologies are being developed to

capture, explore, and disseminate information regarding artefacts, historical knowledge, and cultural inheritance. Digital applications for cultural and heritage institutions; Digital technologies and the museum experience: handheld guides and other media; Museum informatics: people, information and technology. Note: Citations are based on reference standards. However, formatting rules can vary widely between applications and fields of interest or study. The specific requirements or preferences of your reviewing publisher, classroom teacher, institution or organization should be applied. Public Private login. e.g. test cricket, Perth (WA), "Parkes, Henry" Separate different tags with a comma. To include a comma in your tag, surround the tag with double quotes. The new digital resources, in particular the "Web 2.0" and social media, have made it possible for cultural heritage institutions to make their collections available in a new and engaging way. But, in order to do so, the cultural heritage information must also be preserved in a reliable way. Authenticity and Adaptation: The Mongol Ger as a Contemporary Heritage Paradox Schofield, A.
